## SUMMARY

Computer Engineering graduate (Tokat Gaziosmanpaşa University, 2025) with hands-on experience in SQL, PostgreSQL, data modelling, data processing and backend development. Experienced in building data validation and transformation pipelines and working with structured and unstructured data using Python and Node.js. Strong interest in master data management, data quality, data governance and process automation.

## EXPERIENCE

### Computer Engineering Intern | Eduji R&D Software Design and Consultancy Inc.

Bornova, İzmir, Türkiye | July 2024 – September 2024

- Implemented REST API integration and contributed to querying and transforming large data sets through server-side filtering and pagination logic.
- Implemented token-based authentication, state management with GetX, and secure data storage with FlutterSecureStorage.
- Contributed to the development of a survey-based, reward-driven mobile application with Flutter; designed the UI in Figma.
- Tested backend APIs with Postman to validate data contracts, working in close coordination with the backend team.

## PROJECTS

### Portfolio Tracker | Node.js (Express), PostgreSQL, Claude API · [github.com/KaanCan1/portfolio-tracker](https://github.com/KaanCan1/portfolio-tracker)

- Designed an Express + PostgreSQL REST API and relational data model for an investment portfolio tracking and risk analysis application.
- Built a processing layer using Claude API structured outputs to convert unstructured financial text into schema-conformant structured data, with schema validation for data quality control.
- Developed a risk module implementing Value at Risk (VaR) and Monte Carlo simulation.
- Integrated an MCP (Model Context Protocol) server enabling the language model to query the database through tool calls.

### Sentiment Analysis (NLP) | Python, scikit-learn · [github.com/KaanCan1/Film-Yorumlari-Duygu-Analizi](https://github.com/KaanCan1/Film-Yorumlari-Duygu-Analizi)

- Built an NLP pipeline covering text preprocessing, vectorisation, and classification to train and evaluate a sentiment analysis model against performance metrics.

### BeanSocial & Spendly | Flutter, GetX, Firebase, Node.js · [github.com/KaanCan1/beansocial\\_son](https://github.com/KaanCan1/beansocial_son), [Spendly](https://github.com/KaanCan1/spendly)

- Built a social media application with authentication and real-time data (graduation project) and an end-to-end full-stack mobile application for expense tracking.

## EDUCATION

### Tokat Gaziosmanpaşa University | BSc in Computer Engineering | 2021 – 2025

GPA: 88.02 / 100

- Relevant coursework: database management, data structures and algorithm analysis, artificial intelligence, machine learning, statistics, and network security.
- Coursework extended with dynamic web projects in PHP/MySQL and native mobile apps in Java/Android Studio, alongside technical presentation experience.

## TECHNICAL SKILLS

**Data & Databases:** SQL, PostgreSQL, MySQL, SQL Server, SQLite, data modelling, data integration via REST APIs, data validation

**AI / NLP:** Claude API (structured outputs, prompt engineering, MCP), scikit-learn, natural language processing, machine learning

**Programming Languages:** Python, SQL, JavaScript, Dart, Java, C#, PHP

**Backend & Tools:** Node.js, Express, REST API, Docker, CI/CD, Git, GitHub, Postman

**Mobile Development:** Flutter, GetX, Firebase, Firebase Cloud Messaging, Android Studio

**Other:** Object-oriented programming (OOP), UI/UX design, Agile/teamwork

## CERTIFICATES

- Huawei & CloudMetrik – Cybersecurity Bootcamp (HSD, 2026)
- BTK Academy – Git and GitHub
- BTK Academy – Cybersecurity
- BTK Academy – Microsoft Excel Fundamentals

## LANGUAGES

Turkish: Native | English: B2 (Upper-Intermediate) | German: A1 (Beginner)
